REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The applied prior art to Miller et al. (US Pat. 6,403,854) discloses the claimed steps (a) thru (d) of claim 1 directed to quenching an effluent stream from an MTO reactor and adding a neutralization agent to a condensed pumparound stream. Miller et al. differs from the claimed invention in that Miller et al. disclose compressing an entire olefin stream and then caustic washing the entire stream followed by separation of C₂- stream from C₃₊ stream whereas the claimed invention recites separating C₃- stream from C₄₊ stream and then contacting at least a portion of the C₃- stream with caustic. The claimed order of separation and caustic washing steps provide an increase in effectively reducing corrosive materials.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
